PROFILE

AWS Certified Cloud & Technical Engineer with 2+ years of experience as a Technical Engineer, specializing in designing, deploying, and managing scalable, secure AWS infrastructure. Skilled in Docker, Kubernetes, Terraform, GitHub Actions, and MySQL performance optimization. Proficient in AWS services including EC2, S3, IAM, VPC, Lambda, Amplify, and DynamoDB, with expertise in Red Hat Linux, Bash scripting, and CI/CD pipelines. Strong foundation in Python and REST API development.

PROFESSIONAL EXPERIENCE

Technical Engineer

Dusane Infotech, Mumbai | Nov 2022 - July 2026

- Designed and managed AWS infrastructure (EC2, S3, IAM, VPC, Route 53, CloudWatch) for production workloads, ensuring high availability and security compliance.
- Automated cloud resource provisioning using Terraform and CloudFormation, reducing setup time by over 50%.
- Built and maintained Docker containers and Kubernetes deployments, improving application delivery speed and consistency.
- Developed AWS Lambda functions and Bash scripts to automate tasks such as log processing, backups, server health checks, and resource monitoring, reducing manual work and downtime risks.
- Implemented a robust backup strategy for MySQL databases, achieving a 99.9% data recovery rate during restore tests; automated backup processes saved the team 15 hours per month previously spent on manual backups
- Managed Red Hat Enterprise Linux servers, performing updates, patching, user management, and troubleshooting via Linux CLI.
- Integrated monitoring tools and CI/CD workflows with GitHub and Jenkins to streamline deployments, detect issues early, and improve release reliability.

CERTIFICATES

- AWS Solutions Architect – Associate – AWS, 2025
- AWS Technical Essentials – AWS, 2025
- Ansible and Terraform Certificated - CloudDevOpsHub, 2025
- Red Hat certified system administrator (RHCSA - EX200) - Udemy, 2025
- Java Development – Udemy, 2021 (Completed 17 practical Java projects)

PROJECTS

Portfolio Web App

Node.js Cloud Deployment (DevOps)

- Dockerized a full-stack Node.js portfolio application for consistent and scalable deployment
- Set up CI/CD pipeline using GitHub Actions to automate builds and deployment on AWS EC2
- Integrated AWS RDS (MySQL) for backend database and configured secure connectivity
- Implemented monitoring and logging using Amazon CloudWatch for performance tracking and alerting

SKILLS

Cloud & DevOps:

AWS (EC2, S3, IAM, VPC, Lambda, Route 53, SNS, CloudWatch, Amplify), Docker, Kubernetes, CloudFormation, Terraform, Ansible

Systems & Tools:

Red Hat Enterprise Linux (RHEL), Linux CLI, Git, GitHub, Bash Scripting, Monitoring Tools

Database:

MySQL (tuning, backup, migration), SQL, DynamoDB

Web & Scripting:

HTML5, CSS3, JavaScript (ES6), Python, React (Basics) REST APIs

ACHIEVEMENTS

Earned management recognition for rapidly delivering a client-requested, customer-friendly web page and developing a JavaScript logic module that optimized production server efficiency under urgent deadlines.

EDUCATION

Bachelor of Computer Applications (BCA)

Bharati Vidyapeeth Deemed University

GPA: 9.13 / 10
